VACUUM TANKERS | ROAD SWEEPERS | COMBINATION UNITS & RECYCLERS | PUMP SERVICES | SEWAGE TREATMENT PLANT SERVICES | GROUNDWORKS & INSTALLATIONS | WATER JETTING | OIL TANK REMOVAL | CCTV INSPECTIONS | RECYCLING CENTRE | PORTA REELS | GRAB LORRY SERVICES | DRUM & IBC COLLECTIONS

VACUUM TANKERS

Ideal for collecting:

- Sewage
- Sludges and Silts
- Effluents
- Oil and Diesel
- Contaminated water
- Process waste
- Grease

Our extensive, modern and fuel efficient fleet of tankers meet EURO 6 emission standards ensuring that we minimise our Carbon Footprint. They can carry various liquid wastes and have holding capacities up to 27,000 litres (6,000 gallons)

Our vacuum tanker fleet is on standby 24 hours a day, 7 days a week

ROAD SWEEPERS

Ideal for clearing:

- Silts and debris
 - Spills
- Foliage and litter
 - Water
- Non-toxic chemicals
 - Shingle

Whether you need to complete road surface preparation or the removal of silt and debris from your site, we have the machinery for the job. We operate a fleet of state of the art road sweepers with highly trained and experience operatives.

We support the commercial industrial and domestic sectors with highway maintenance works

A yellow County Clean truck with a red crane is lifting a red drum. The truck has 'COUNTYCLEAN ENVIRONMENTAL SERVICES LTD' written on its side. The crane is a red hydraulic boom crane. The drum is a large red metal drum. The truck is parked on a paved surface. In the background, there are industrial buildings and a clear blue sky.

Ideal for handling materials and equipment that are too heavy or awkward for manual loading.

CRANE LORRIES

Ideal for collecting & lifting:

- Drums and IBC containers
- Heavy packaged hazardous waste
- Plant, machinery and bulky equipment
 - Large bulky materials
- Palletised waste and oversized items

Designed with a powerful crane, they can handle the heavy lifting, saving you time and effort while keeping things secure. They are built to meet safety standards, so you can feel confident that your waste is being managed properly.

Our high powered Bucher combination units are cost effective & environmentally friendly

COMBINATION UNITS & RECYCLERS

Ideal for deep lift extraction, jetting and disposal of;

- Liquid waste
- Sludges and silts from culverts
- Pipeline clearing
- Gully clearing
- Catch pit emptying

Our impressive and powerful Bucher Flexline CM140 Vacuum and jetting combination units can take on any demanding task.

These units have a variety of suction hoses, with a large waste capacity tank, combined with a high powered Uraca jetting pump and fitted with two jetting hose reels. A one inch hose with a reach of 590ft (180m) and a second half inch hose with a range of 164ft (150m) to tackle a range of tasks.

WATER JETTING

Our van pack jetting units are highly mobile and can respond quickly to emergency call-outs

With the latest equipment and a broad range of jetting nozzles, we have the capacity to deal with the blocked drains of commercial and domestic property owners using high pressure water jetting up to 100 metres away from our units

Ideal for clearing and cleansing of;

- Small bore pipework
- Drainage systems
 - Wells
- Interceptors
- Catch pits
 - Tanks
- Grease traps

Using powerful water jets, we can efficiently clear deposits of fat, debris and other objects, as well as clean graffiti off buildings

OIL TANK REMOVAL

We have a full range of equipment and trained operatives to carry out oil tank removal, cleaning, emptying and disposal from;

- Large industrial tanks
- Small domestic fuel tanks
- Bunds

It is essential to properly dispose of oil tanks by getting them professionally decommissioned as advised by the UK Government website

With the appropriate equipment and a full support service, oil tank removal can be arranged for a prompt, safe and efficient all-in-one solution

**Safe and secure oil tank
removal & decommissioning**

Our CCTV sewer survey for
Thames Water identified the
exact location of the
infamous fatberg in
Kingston-Upon-Thames

CCTV INSPECTIONS

CCTV surveys can be carried out
to;

- Confirm integrity of pipework
- Identify any potential blockages
- Confirm connectivity of a drainage system

We use the latest MiniCam crawler and push
rod camera systems with fully trained
operators to create a CCTV survey report of
drainage systems
